

HUDSON

MACHINE & TOOL

ADDITIONAL SERVICES

- **Heat Treating:** Enhancing the properties of your components for improved performance and longevity.
- **Non-Destructive Testing (NDI):** Ensuring the integrity of your parts without compromising their usability.
- **Precision Grinding:** Achieving the highest level of accuracy and surface finish for your critical components.
- **Magnetic Particle Inspection (MPI):** Detecting surface and subsurface discontinuities in ferromagnetic materials.
- **Specialty Coating:** Providing protective and functional coatings to enhance the performance of your parts.
- **Destructive Testing:** Assessing the material properties and performance limits of your components.
- **Casting:** Offering a range of casting methods for the production of complex shapes and designs.
- **Automated Cutting:** Utilizing advanced technology for precise and efficient cutting of materials.
- **Raw Material Sourcing:** Ensuring the availability of high-quality materials for your manufacturing needs.
