## MACHINE & TOOL

## FOOD GRADE MACHINING

Hudson Machine & Tool specializes in precision CNC machining tailored for the food industry. Our expertise lies in crafting high-quality stainless steel equipment used in food processing and packaging. With a focus on food-contact parts, we cater to diverse clients, including those in the dairy sector, ensuring adherence to stringent food safety regulations. We consistently deliver stainless steel components that meet all industry requirements.

## OUR SERVICES

Whether you require a single bespoke piece or a substantial production order, Hudson Machine & Tool has the right facility and machinery to suit your needs. We possess both the necessary skills and cutting-edge equipment to successfully fulfill your project. Our team is equipped to handle both custom part manufacturing and large volume production runs, selecting the correct facility and machine for each job.
